ABOUT US

Who we are

We Provide
Best Solution
with **100** Employee

Silicon Software Solutions is a rapidly growing custom development and software company in beautiful Rajkot, Gujarat, India. We specialize in the development of custom **software** applications, **GIS Services & Data Entry** Projects. Specifically, our company carries out custom programming, database design, client-server and internet/intranet software application development. Over the years we have managed to build a solid team of software development professionals that come from various backgrounds and expand the creative potential of the company. The expertise that they possess embraces a wide range of custom programming skills involving the latest and most effective development technologies, such as **.NET (ASP.NET, C#, VB.NET), XML** and many more. This to a great extent defines the quality and reliability of the custom software applications that we develop. We deliver custom application programming services to end customers and we provide software development services for other IT companies. Our competence and experience ensure that we deliver excellent services and products to our customers. At every stage of the development process, from conceptual design to product release, the highest quality standards are maintained.
